BABY BANK FINANCE

Visual user guide

A practical guide to recording and reviewing your charity’s income and expenditure.

Who is this guide for?
Staff members and administrators who use Baby Bank Finance. The screens and actions available depend on your account role.

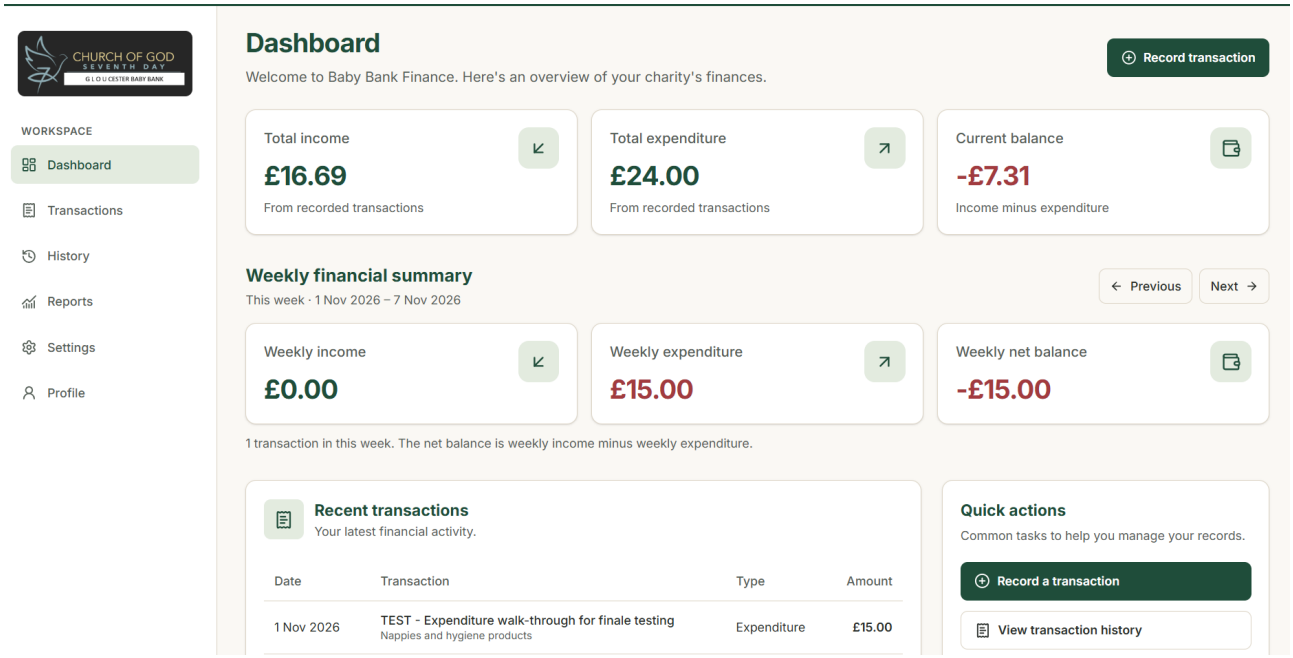

Figure 1. The dashboard at a glance.

Quick reminder Keep descriptions clear, enter the correct amount and date, and wait for the success message before leaving a transaction form.

1. Sign in and manage your account

Open the web address supplied by your charity. Enter your registered email address and password, then select **Sign in**. Use **Forgot password?** if you need a reset link.

Registering a new account

1. Select **Create an account** on the sign-in screen.
2. Enter your full name, email address and a password between 12 and 128 characters. Confirm the password and submit.
3. Open the verification email and confirm your email address.
4. Wait for an administrator to approve your access. Financial records remain unavailable until approval.

> **New account?** Email verification does not automatically grant access. Contact your charity administrator if approval is delayed.

Your profile

Open **Profile** to check your name, email address, account role and access status. Select **Log out** when you finish your session.

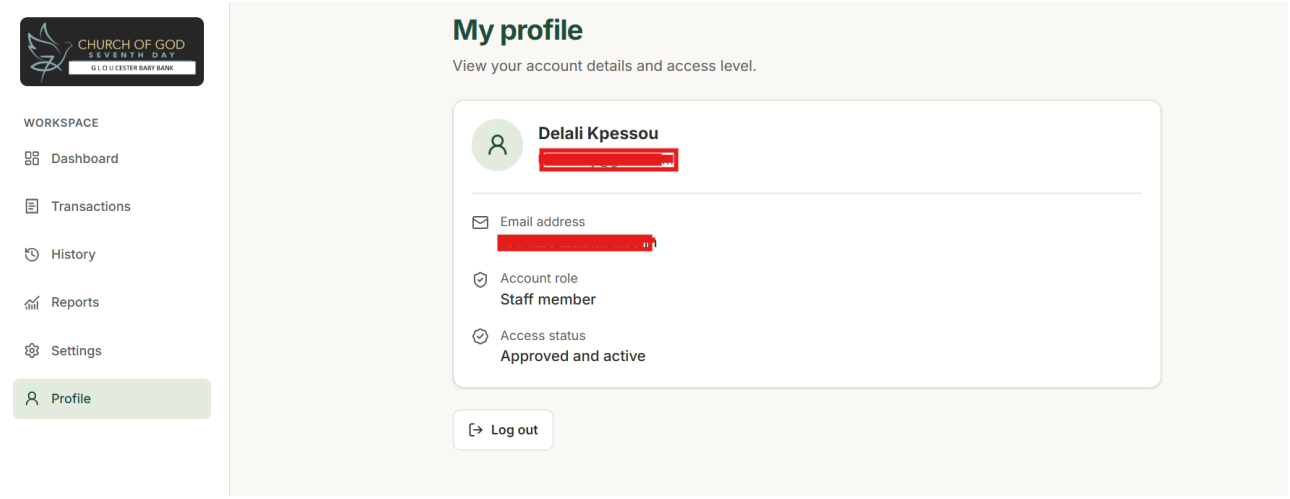

Figure 2. Profile details and the Log out button.

2. Dashboard

The dashboard summarises total income, expenditure and current balance. It also shows the selected week's figures and recent transactions.

Use **Previous** and **Next** to move between weeks. Select **Record transaction** to add a record, or **View transaction history** to review existing entries.

3. Record a transaction

Open **Transactions** or select **Record transaction** from the dashboard.

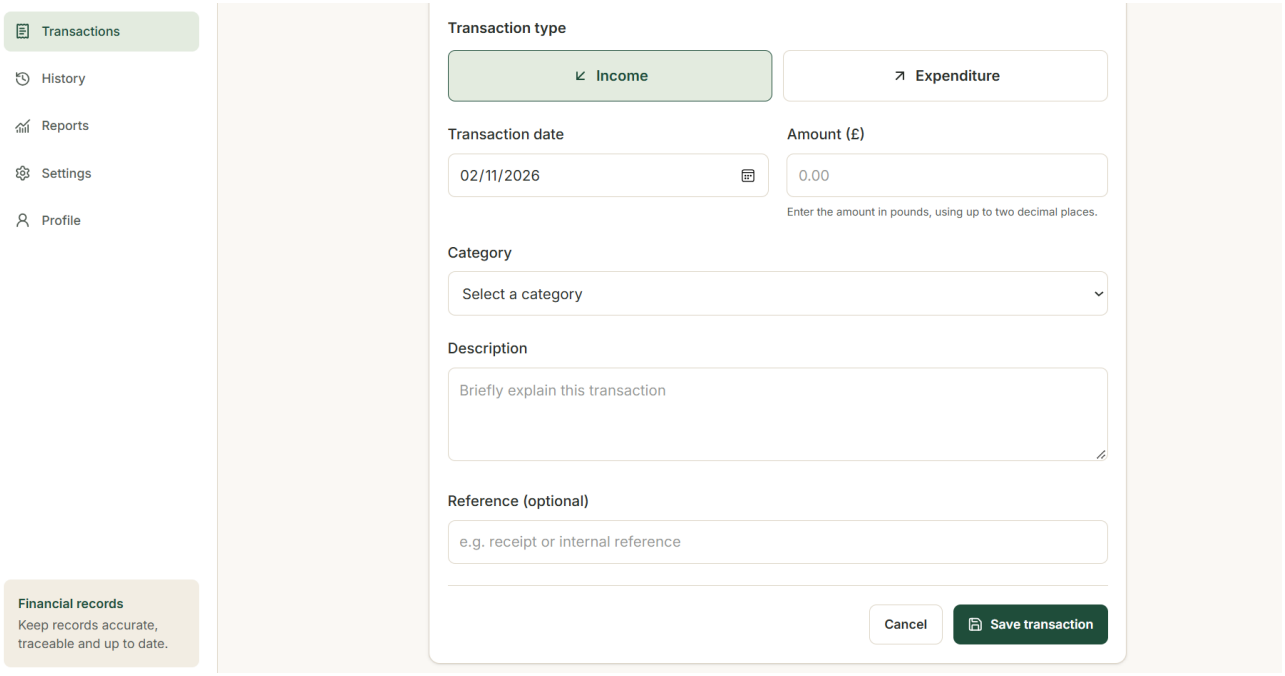

Figure 3. The transaction form. Complete each field before saving.

Complete the form in this order:

1. **Transaction type** — choose **Income** for money received or **Expenditure** for money spent.
2. **Date** — enter the date the transaction took place.
3. **Amount** — enter the amount in pounds (£).
4. **Category** — choose an active category that matches the transaction type.
5. **Description** — briefly explain what the transaction was for.
6. **Reference (optional)** — add a receipt number or internal reference if available.
7. **Save** — check the details, select **Save transaction** and wait for the success message.

Important checks

- Amount must be greater than £0.00 and have no more than two decimal places.
- Description must contain at least three characters.
- Transactions cannot be saved offline. Reconnect and submit again if a connection error appears.
- If no suitable category is available, contact an administrator.

4. Search transaction history

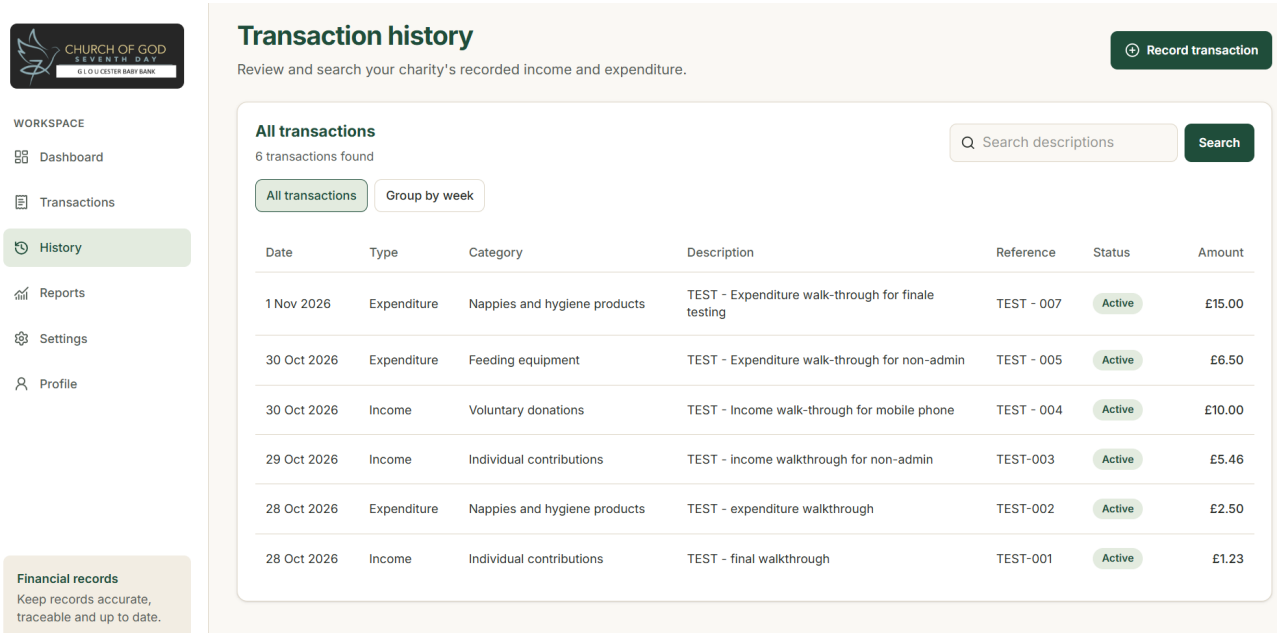

Figure 4. History lets you search descriptions and switch between list and weekly grouping.

Open **History** to review transaction dates, types, categories, descriptions, references, statuses and amounts. Search using words from the description. Choose **All transactions** or **Group by week**.

5. Financial reports

Open **Reports** to review income, expenditure and net balance, alongside weekly summaries and a monthly trend chart.

To focus on a period, choose a **From** date and/or **To** date, then select **Apply dates**. The start date must be on or before the end date. Select **Clear** to return to the full date range.

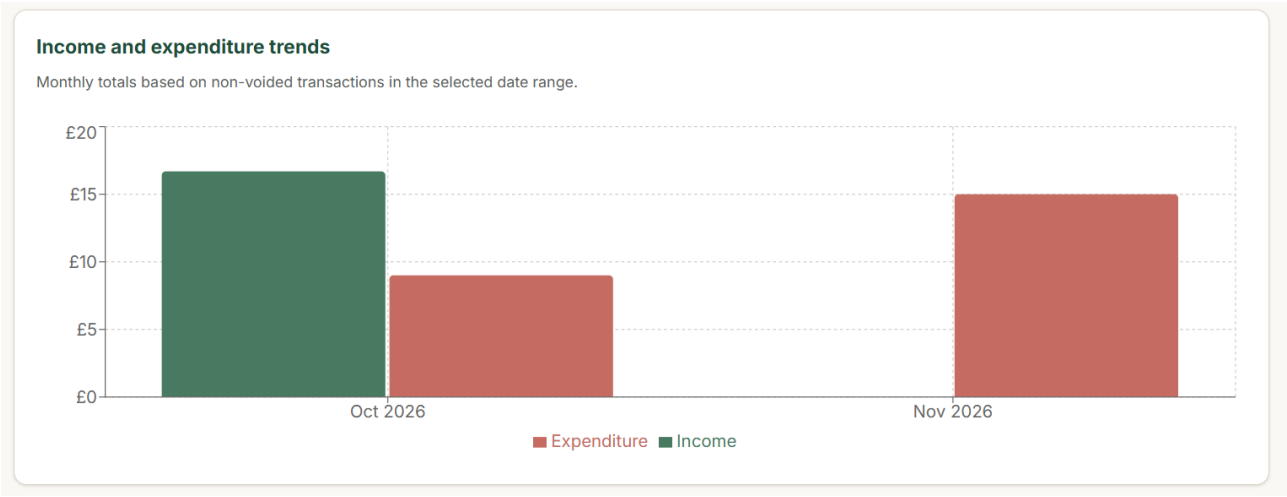

Figure 5. Monthly income and expenditure trends.

Exporting a report
Select **Export PDF** to download the selected period's summary totals, weekly and monthly summaries, and detailed transaction records. Voided transactions are excluded from report totals and exports.

6. Settings

Open **Settings** to view the charity name, currency, timezone and first day of the week. Staff can view these preferences but cannot change them. Only an active administrator can edit and save them.

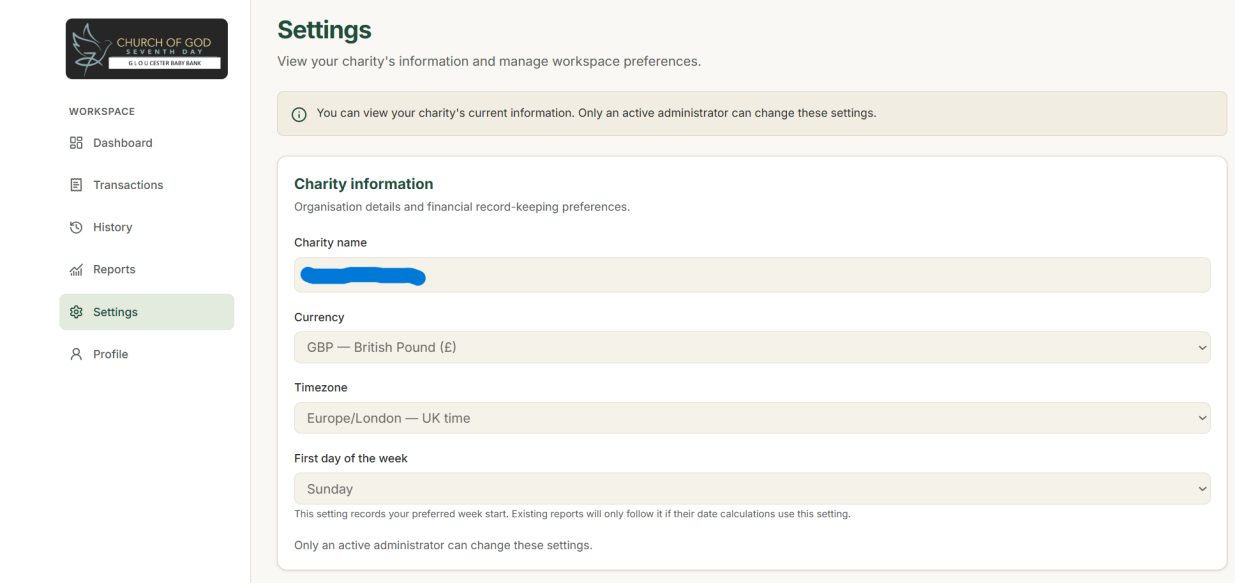

Figure 6. Staff view: settings are visible but read-only.

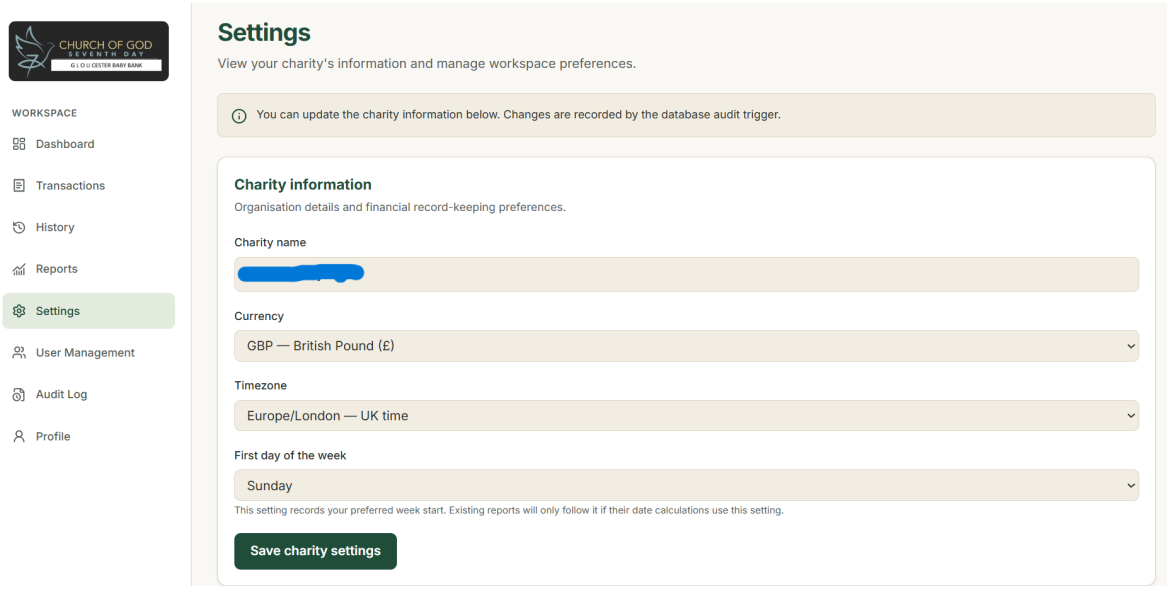

Figure 7. Administrator view: editable settings and the save button.

Before changing settings
Agree changes with the charity first. These preferences affect how financial information is presented, and changes are recorded in the audit log.

7. Administrator tasks

Administrator-only links appear in the workspace navigation. Only approve people who should have access to charity financial records.

Approve and manage users

1. Open **User Management**.
2. Review each registered user's role and access status.
3. Select **Approve** for a pending staff account, or **Deactivate** to remove an active staff member's access. An inactive account can be approved again.

An administrator cannot change their own access here; administrator accounts are managed separately.

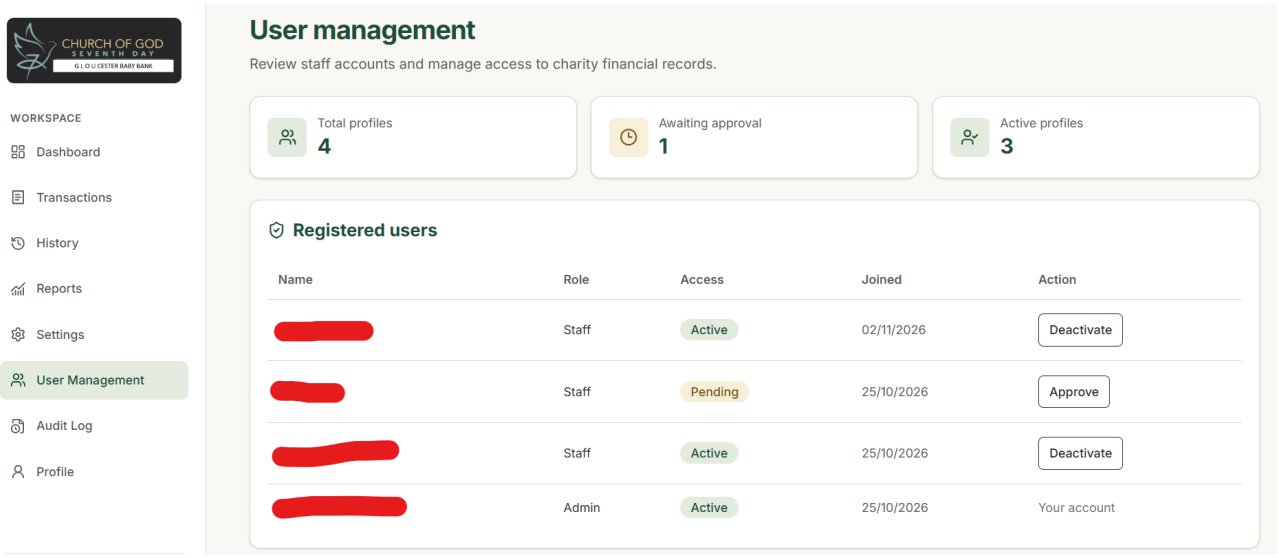

Figure 8. User Management shows pending and active accounts.

Void or restore transactions

In **History**, administrators can select **Void** on an active transaction, enter a reason and confirm. Voiding removes the transaction from financial totals without erasing its history. To include it in totals again, select **Restore** on the voided record and confirm.

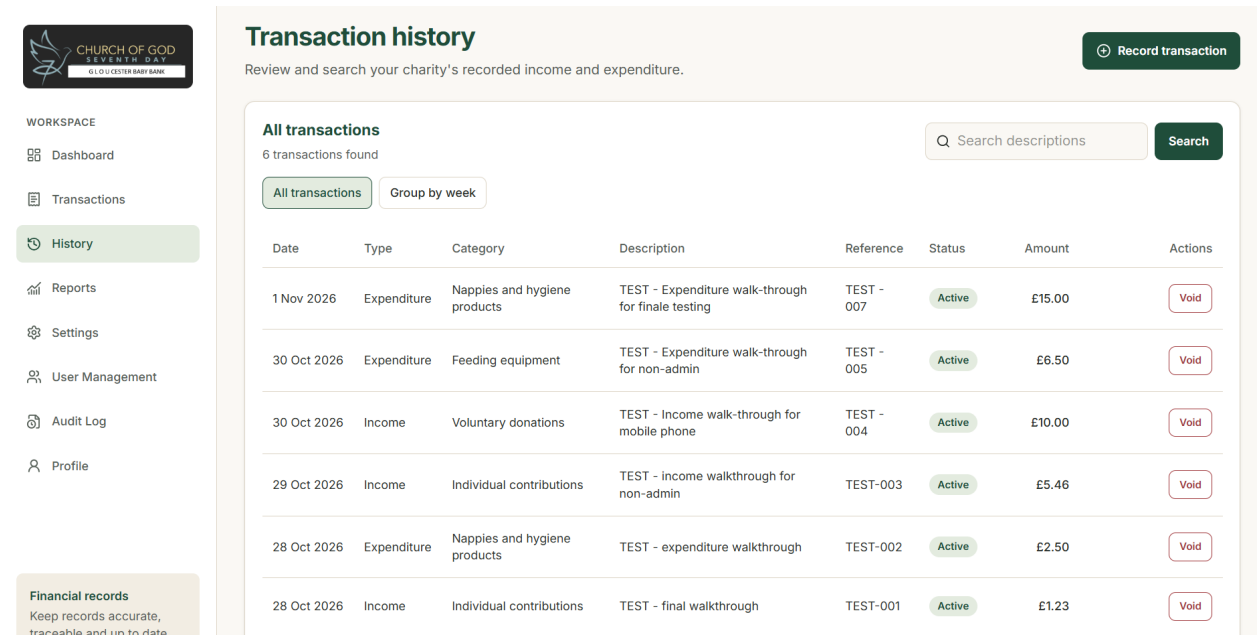

Figure 9. Administrators have transaction actions in History.

Take care
Voiding or restoring a record changes dashboard and report totals. A reason is required when voiding a transaction.

Audit log

Open **Audit Log** to review recorded activity, including who made changes and previous or new data where available. The page displays up to the 100 most recent entries.

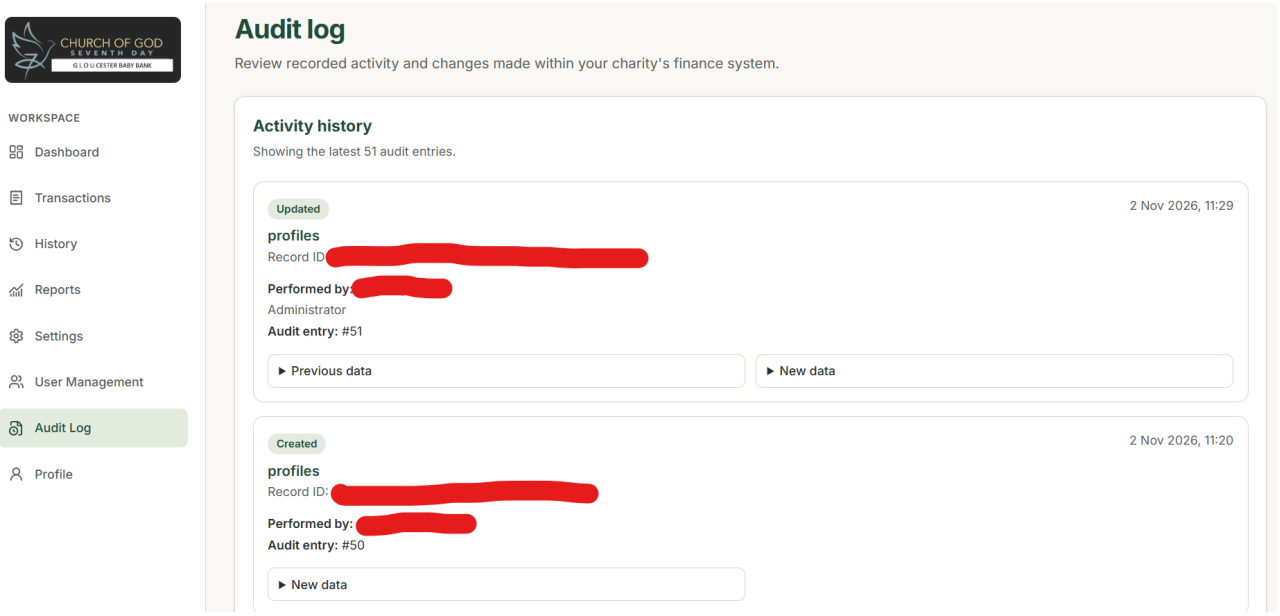

Figure 10. Audit Log records activity and allows administrators to expand previous and new data.

8. Staff and administrator permissions

Feature	Staff	Administrator
View dashboard, history and reports	Yes	Yes
Record transactions	Yes	Yes
View charity settings	Yes	Yes
Change charity settings	No	Yes
Approve/deactivate staff accounts	No	Yes
Void or restore transactions	No	Yes
View audit log	No	Yes

9. Getting help

• For account approval, access problems or missing categories, contact your charity administrator.

• If a page says information could not be loaded, refresh the page and try again.

• If the problem continues, contact an administrator and explain what you were doing when it happened.

• If you see a connection error while recording a transaction, reconnect and check History before submitting again to avoid creating a duplicate.

Good record-keeping habits
Enter transactions promptly. Use clear descriptions. Check amounts and dates before saving. Keep login details private. Never share your account with another person.
